Brand Expression Guidelines

Published Version 1.2. Updated 23 January 2025
Amazon Confidential - Internal Use Only

Introduction

The Amazon Customer Service brand is more than just a logo - it's a promise of trust, reliability, and exceptional service that millions of Amazon customers around the world count on every day.

Our visual identity needs to reflect the same level of excellence and care that we bring to every customer interaction. These guidelines have been thoughtfully crafted to ensure our brand communicates confidence, accessibility, and trustworthiness across every touchpoint.

By maintaining consistency in how we present ourselves both internally and externally, we strengthen the connection between our customers and the world-class service they've come to expect from Amazon.

Logo

To highlight the role of Amazon Customer Service as a customer-facing service, our new logo is represented by a lock-up with the Amazon Brand logo and/or its core elements (e.g., Amazon smile), and has been optimized and refined to increase accessibility and scalability. There are both primary and secondary versions of the logo. The following guidelines describe how each version should be used externally and internally.

Primary Logo

External usage:

The primary logo is used to communicate the Amazon Customer Service brand and should be the only version of the logo shared externally to represent Amazon Customer Service when using a logo outside of an Amazon channel (e.g. marketing materials, publications, social media, external speaking events). For example, if a CSLT member were presenting at an external conference, this logo would be required.

Internal usage:

This logo is approved for all internal usage.

[Amazon Customer Service Primary Logo](#)

The primary logo features the word "amazon" in a teal sans-serif font, with a teal curved arrow underneath it pointing from the 'a' to the 'z'. To the right of this is the text "customer service" in a larger, bold, teal sans-serif font.

Secondary Logo

External usage:

The secondary logo is an alternative to the primary logo to be used only on Amazon/CS-controlled assets (e.g., Amazon websites, Amazon marketing materials). While the primary logo is preferred, the secondary logo can be used as needed (e.g. due to size constraints) on Amazon-branded external assets. For example, this logo can be used on Amazon.com, as the Amazon brand is visible in conjunction with the customer service logo.

Internal usage:

This logo is approved for all internal usage.

[Amazon Customer Service Secondary Logo](#)

The secondary logo features the text "customer service" in a bold, teal sans-serif font, with the word "customer" on the top line and "service" on the bottom line. A teal curved arrow is positioned below the word "service", pointing from the 'c' to the 'e'.

Brand Colors

Our Amazon Customer Service brand colors are CS Teal, White, and Squid Ink. The CS Teal color was carefully chosen as our primary brand color to help our customers feel calm, reassured, and confident they'll receive the kind of exceptional customer service they've come to expect from Amazon. While the colors below represent our primary color palette, the [Amazon Brand colors](#) may also be used as secondary colors with the Amazon Customer Service logo.

CS Teal

HEX: #007185
RGB: 0, 113, 133
CMYK: 89, 43, 38, 9
PMS: 3145 C

White

HEX: #FFFFFF
RGB: 255, 255, 255
CMYK: 0, 0, 0, 0

Squid Ink

HEX: #161D26
RGB: 22, 29, 38
CMYK: 95, 70, 0, 85
PMS: 4146 C

Color Contrast

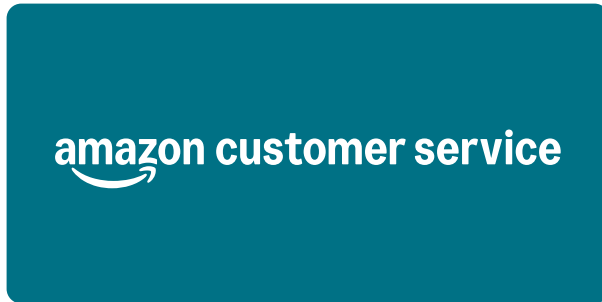

Brand colors must be paired according to these guidelines to ensure color contrast accessibility. For more information about our accessibility standards visit the [Visual Design Accessibility Guidelines Wiki](#).

Background Color	Text Color	Ratio	<14pt	14-18pt	18pt+
CS Teal	White	5.6			
	Squid Ink	2.3			
White	CS Teal	5.1			
	Squid Ink	14.6			
Squid Ink	CS Teal	2.2			
	White	14.4			

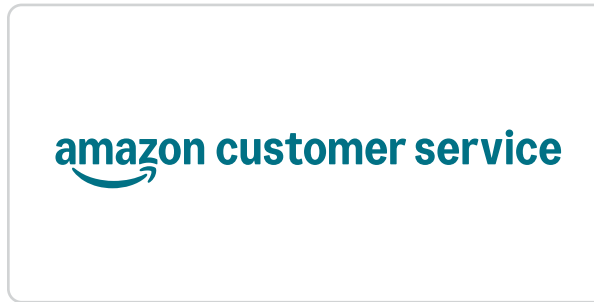

Use Bold Only Do Not Use

Color Versions

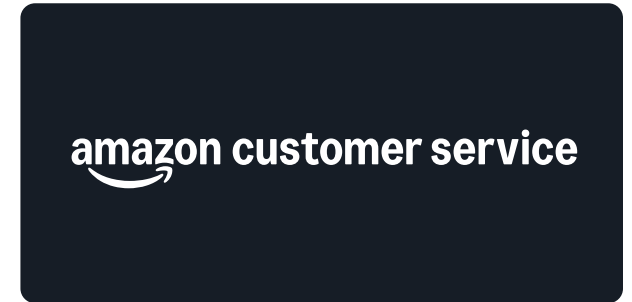

When working with color, choose the option that best supports the brand while providing high contrast and clarity. If your background is light, use the CS Teal or Squid Ink version of the logo. If your background is dark, use the white logo. Amazon Customer Service is committed to meeting bar-raising accessibility standards. Always ensure the contrast ratio meets a minimum of 3:1. To test your contrast ratio, visit [Bridge-PCA Contrast Calculator](#).

Minimum Size

To ensure that our logos are always legible and recognizable, no matter the scale, please follow these minimum size guidelines.

Amazon Customer Service Primary Logo

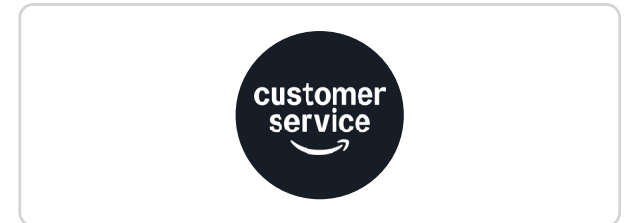

Amazon Customer Service Secondary Logo

Small Space

Avatars

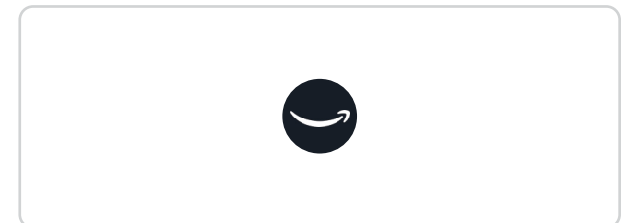

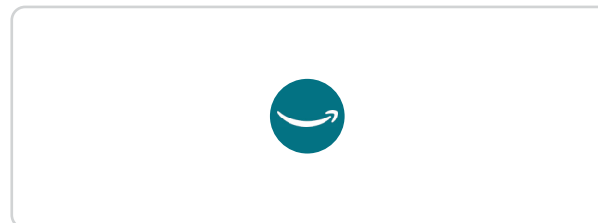

Use the Amazon Customer Service secondary logo for small-space uses like social avatars between 50px to 110px.

[Amazon Customer Service Avatars](#)

Favicons

For favicons (icons used in a browser's address bar, tabs, or bookmarks list) or other spaces smaller than 50 px, use the Smile logo - it has been optimized for use in small spaces.

Logos in Use

The following are examples of how the new Amazon Customer Service logo and color palette is being used for our customers.

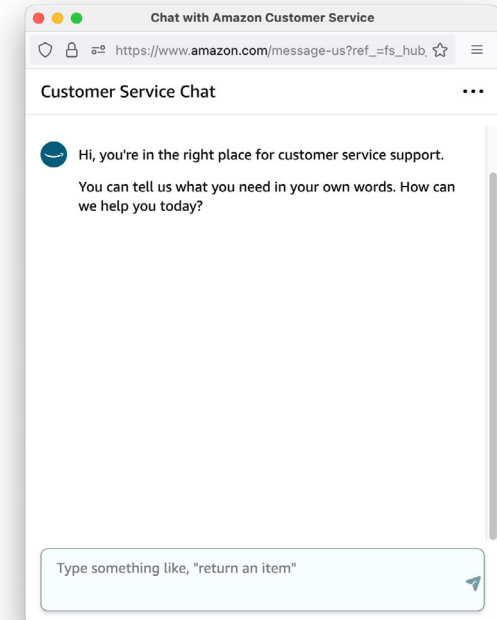

Amazon.com Search

When customers search for Amazon Customer Service on Amazon.com, our primary logo appears with an invitation to Contact Us.

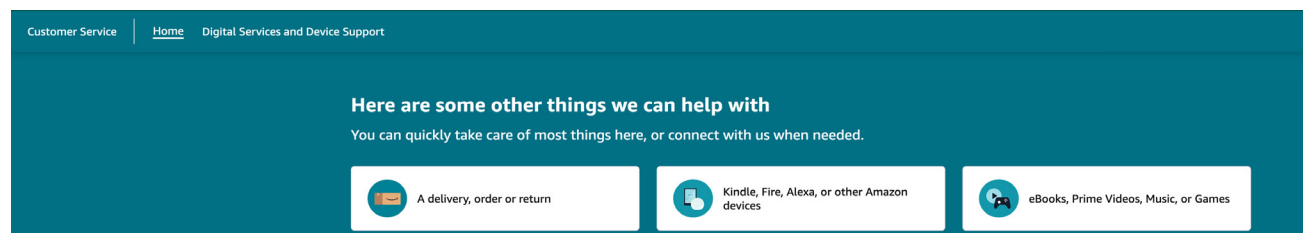

CS Chatbot

CS Chatbot uses the CS Teal favicon when interacting with customers.

Amazon.com CS Landing Page

When customers arrive on the main landing page for Amazon Customer Service, the background of the page uses CS Teal.

Misuse

To maintain brand integrity, do not alter the Amazon Customer Service logo artwork, proportion, or color. The following examples show incorrect uses of the logo.

DON'T outline the logo.

DON'T remove elements from the logo.

DON'T skew or rotate the logo.

DON'T add any effects such as drop shadows.

DON'T modify or recreate the artwork.

DON'T use the logo in a sentence.

DON'T add more smiles to the logo.

DON'T use the logo in an unapproved color.

DON'T place the logo over a photo background that is too complex or busy.

Legacy Customer Service Logo

Our legacy Customer Service logo should be replaced by the new Amazon Customer Service logo in all external and internal uses. As part of our transition to the new logo, if there are use cases where the new logo cannot be used right away (e.g., cost limitations of replacing physical signage, printed materials, etc.) the legacy logo may continue to be used through the **end of August 2025, at which point all uses should be discontinued**.

All uses of the legacy Customer Service logo should be **discontinued by the end of August 2025**.

Legacy Vertical/Horizontal Logos

The following are examples of internal vertical/horizontal logos currently being used in CS. These logos should be updated to match the new Amazon Customer Service logo (see next page for guidelines on using team names with the new Amazon Customer Service logo).

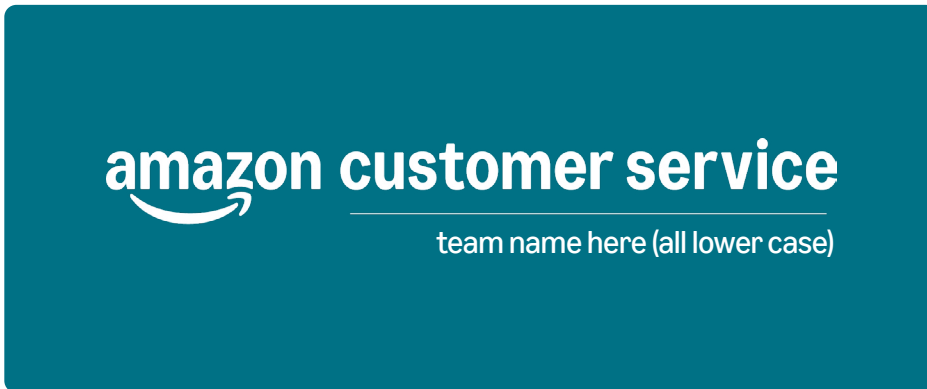

Using Team Names with the Amazon Customer Service Logo

All CS vertical/horizontal orgs should use the new Amazon Customer Service logo as a lockup with the name of their org to replace their legacy logos. These new lockups may only be used internally and are **NOT APPROVED** for external use. Sub-teams within each vertical/horizontal may continue using their existing logos, or may choose to update their team logo using the new lockup templates below.

Primary Logo

[Use this template](#) to create a lockup with the primary logo.

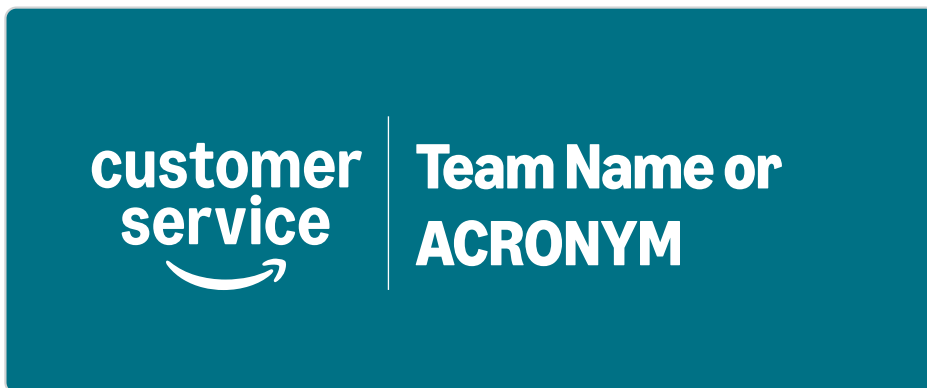

[Amazon Customer Service Team Primary Logos](#)

Example A:  device, digital & alexa support

Example B:  business

Secondary Logo

[Use this template](#) to create a lockup with the secondary logo.*

[Amazon Customer Service Team Secondary Logos](#)

Example C:  Stores

Example D:  SDS

**When creating a lockup with the Secondary Logo, team names should be spelled using title case, with the first letter of each word capitalized (see example C). Acronyms should be spelled using all UPPERCASE letters (see example D). The size of font used to display the team name or acronym can be adjusted, but should never exceed the size of the font used in the logo. Always use approved templates when creating a team lockup.*
